

# Dual Circuit Multi-Outlet Generator Cords

5' & 25'

Lighted outlets/Power-on indicators.

**Rated 20 A/250 V  
Inline 18 A/125 V**

**Two 20-Amp Circuits  
in One Cord**

**5 Outlets With  
Weather Guard**

**Twist-Lock Plug Ends**

**Insulated 600 V/STW**

**Limited Lifetime  
Warranty**

Patent No. 5902148

## APPLICATIONS

GeniMAX™ Generator Extension Cord is ideal for high-powered or hard-to-reach job sites, as well as emergency or disaster-site lighting and work. Two 20-amp circuits in one cord make generator power go farther, putting 5,000 watts of power right where you need it most. Furthermore, a 250-volt Twist-Lock circuit feed allows for additional GeniMAX™ Inline Multi-Outlet cords, allowing users to run power over longer distances with minimal voltage drop. Five outlets with mounting anchors make for multiple plug-ins. And because GeniMAX™ cords carry 5,000 watts, they also distribute power more efficiently, so fewer cords are necessary – which reduces material costs and trip hazards. Finally, color-coded lighted circuit ID tells you which of the two 20-amp circuits your workers are drawing power from, helping sidestep overloads and resulting work delays.

## SPECIFICATIONS

Copper wire with PVC insulation and jacket.

615-16457HDR (5') packed by Taco. 615-16457AB (25') packed by Box.

Weight:

615-16457HDR (5') = 4.1 lbs.

615-16457AB (25') = 11 lbs.

## INDUSTRY STANDARDS/CERTIFICATIONS

UL®/CSA/ETL Classification: General Use, Adaptor Cord Set

UL No. E55943

CSA No. LR-35162

OSHA

## PRODUCT CODE NUMBER / UPC CODE

615-16457HDR (5') / 048243993604

615-16457AB (25') / 048243993598
