

WE DO THE MATH

So you don't have to

HOW MUCH IS LEFT? ENOUGH FOR ANOTHER RUN?

Cerrowire's True Sequential Footage™ tells you in seconds. Featured on our large reels of THHN, USE-2, and XHHW-2 (1,000 foot and longer, 1 AWG and larger) are easy-to-read footage marks from beginning to end. With True Sequential Footage, you know where to cut for a precise, accurate length, and remaining footage can be identified easily. That's better inventory and cost control.
