

July 6, 2022

This letter details Cerro Wire LLC (Cerrowire) compliance to European directives and regulations as indicated below.

REACH Regulation

The European Regulation (EC) No. 1907/2006 concerning Registration, Evaluation, Authorization and Restriction of Chemicals (also known as the REACH regulation) requires supply chain participants to communicate the presence of chemical substances identified as Substances of Very High Concern (SVHC) that are present at concentrations above 0.1% by weight. SVHC are identified on the Candidate List of the European Chemicals Agency (ECHA). As of June 10, 2022, the list includes a total of 224 substances and may be found at the following website:

<https://echa.europa.eu/candidate-list-table>

To the best of our knowledge all Cerro Wire LLC products are manufactured in compliance with the REACH regulation and do not contain substances listed on the SVHC candidate list (as updated June 10, 2022) at concentrations above 0.1% by weight.

RoHS Directives

To the best of our knowledge all Cerro Wire LLC products are manufactured in compliance with the latest (as of date of this letter) European Restriction of Hazardous Substances Directives (also known as the RoHS Directives), including RoHS Directive 2015/863/EU (sometimes referred to as RoHS 3). Substances of concern in these directives are not intentionally added to Cerro Wire LLC products nor are they present at levels above the maximum permitted by the directives.

Sincerely,

Kevin L. Dalrymple
Director of Quality
