

Our Best Lineup of the Century

cerrowire®
100
Years
1920-2020

Cerrowire is celebrating **100 years** of **Made in the USA** copper wire, with innovations that save you time and money.

SLiPWire™ technology

SLiPWire™ self-lubricating polymer jacket makes our 8 AWG – 1000 kcmil THHN and all CerroMax NM-B pull faster and smoother. In addition, our Co-Extrusion delivers a stronger bond between the insulation and the outer jacket.

TRUE Sequential Footage™

True Sequential Footage™ is printed right on the wire on 1 AWG and larger master reels. You'll always know what you've used and how much is left.

MaxPrint®

MaxPrint® clearly identifies the Cerrowire wire size with large print.
