

SAFETY ALERT

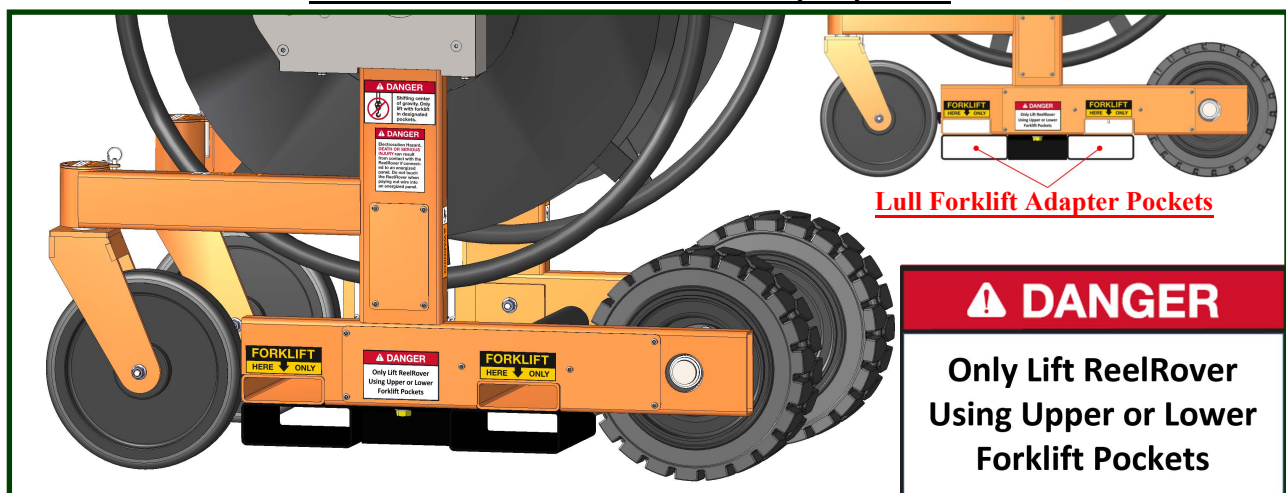

ATTENTION: Important safety information is contained in this bulletin. All users and contractors must read, understand, and follow these vital warnings and instructions. If you have any questions about this alert, contact Joshua East at 224.365.9051 or jeast@cerrowire.com.

APPLICATION: ReelRover™ models 3+1 and 1+1.

REASON FOR RELEASE: To avoid accidents or serious injuries when lifting ReelRover™ units equipped with the lull-forklift adapter via telehandler, lull, or other types of rough terrain forklifts. Lull forks must only be positioned inside the ReelRover™ lull forklift adapter pockets. Lifting the ReelRover™ with lull forks in an incorrect location or manner, other than what is shown below, is extremely dangerous and may result in injury or death.

INCORRECT LIFTING: If the lull forks are positioned anywhere other than within the provided pockets shown below, the ReelRover™ can slide, shift, become unstable, and fall, which may result in injury or death.

Do not lift from under the lull forklift adapter pockets.

CORRECT LIFTING: Lift all ReelRover™ models by positioning the forks being utilized inside the appropriately sized forklift pockets, either located at the bottom of the ReelRover™ frame (orange pockets) or within the lull forklift adapter pockets (black pockets) located below the ReelRover™ frame, as indicated by the photo above.

URGENCY: Immediate.

LONG TERM RESOLUTION: All attempts to move any ReelRover™ with a forklift or lull must utilize the provided forklift or lull tubes as shown above.

USER STEPS: Ensure all personnel moving and/or operating the ReelRover™ are trained and aware of this warning and use the proper method to lift and move the ReelRover™. Scan the QR code (right) for ReelRover™ operating manuals, videos, and resources.

NOTE: All work must be performed by qualified personnel only. Only qualified and OSHA certified forklift operators should attempt to move a ReelRover™ using a forklift. All applicable OSHA safety standards, training, safe industry practices, and local code/ordinances must be observed and followed. Observe all safety information contained in the ReelRover™ User Manual & Operating Instructions, and in the ReelRover™ Periodic Maintenance Technical Service Manual. This bulletin, and all related technical information, must be made available to all personnel working in any way with a ReelRover™.
