MC Cable Barrel
LABOR SAVING • SEQUENTIAL FOOTAGE

1 - Cerrowire MC Cable Barrels arrive on a pallet, making it easy to move into position with a forklift. Four, 75-gallon barrels fit on one pallet.

2 - Unlatch the lid locking ring.

3 - Remove the MC Barrel lid.

4 - Colored chevrons printed on the armor show the conductor colors inside and point in the easiest direction to pull. There's also a black line every two feet, making it **easy to cut exact lengths** without using a tape measure.

5 - Lift the first loop of Cerrowire MC Cable to load into your equipment. The MC Cable pays out from the barrel in the correct direction for smooth installation.

MC Cable Barrel Specs

AWG/ conductors	Footage	Approx. Net Product WT Lbs.
12/2 solid	2000	207
12/2 stranded	2000	211
