

cerrowire®

THE ZEN IS IN THE BEND

OUR NEWEST INNOVATION – CERROFLEX™

Our large gauge wire delivers power through the tighter twists and turns where extra-flexible wire makes the job a lot easier. Compared to traditional THHN/THWN-2 and XHHW-2, even the largest gauge CerroFlex™ can make a bend in a matter of inches, not feet.

CerroFlex™ bundles up to more than a thousand thin copper strands to give it amazing flexibility, plus it carries the same power specifications and insulation found in our standard Cerrowire THHN/THWN-2 and XHHW-2.

When you're facing tight cabinet spaces, or sharp turns, choose **CerroFlex™** – it's a turn for the better.

- Perfect for Data Centers and Water/Wastewater Plants
- 1/0 through 750 kcmil
- Multiple colors available
