TRUE Sequential Footage™

MASTERING THE MATH

...easier than ever

Scan to learn more

HOW MUCH IS LEFT? ENOUGH FOR ANOTHER RUN?

Cerrowire's True Sequential Footage™ on master reels shows your distributor team exactly where to cut and what's on hand. Starting at zero in the center, easy-to-read marks are printed every two feet. With True Sequential Footage, you know where to cut for a precise, accurate length. The remaining footage on the reel can be easily identified. That's better distributor inventory and cost control.

Master Reels with True Sequential Footage	
1 AWG – 500 MCM	2500' and longer
600 MCM	2000' and longer
750 & 1000 MCM	1500' and longer
